**The SCF Store Textbook Affordability Student Options**

In compliance with the Higher Education Opportunity Act along with the Florida Department of Education’s Council of President’s adopted procedures for Textbook Affordability, The SCF Store has developed a number of textbook options for students each semester as follows:

- Textbooks bundled with supplemental materials that are available in The SCF Store must be adopted, required and utilized in the classroom by the course instructor; otherwise textbooks must be available in the standalone version.

- The SCF Store offers a wide selection of used textbooks for as many courses as possible.

- The availability of textbook information to include ISBN, title, author, publisher, edition, and copyright will be posted on The SCF Store’s website at least thirty (30) days before the first day of class for students to search for course materials.

- Provide more affordable alternatives to high cost printed textbooks, such as UDT’s or ebooks, loose-leaf packages, SCF custom books, and college printed materials.

- The implementation of a textbook rental program that gives students the opportunity to significantly reduce the cost of certain books.
