## DEGREE OVERVIEW

SCF's Radiography program offers students innovative educational opportunities to equip the community with skilled and compassionate radiographers who are capable of conducting high-quality procedures as an integral member of the health care team.

This is a limited enrollment program, and students are admitted once a year with classes beginning in the Summer term. Completion of all or part of the general academic courses required for the degree does not guarantee acceptance into the program. Priority is given to applicants who have completed the most required hours of general education coursework toward the degree by the end of the Fall term preceding the year of application. If there are more qualified applicants than seats available in the program, the primary criteria for selection is the GPA of the general education courses required by the program. Graduates will be eligible to take the American Registry of Radiologic Technologist Exam to become a registered radiographer.
